

## De-bugging Log

| Project: User-centric Front End Milestone |   |               |  |
|---|---|---------------|--|
| Date                                      | Description of bug  | Page          | Solution   |
| 10/01/2020                                | d-sm-none is causing things to disappear when on a large screen and appear on a small. It should be the opposite. | meetings      | Fixed by putting the right classes in.   |
| 10/01/2020                                | aligning the navbar button on the right and the logo on the left by using bootstrap grid system.                  | index         | fixed with putting an offset of 1 in and ml-auto into the class which controlled the collapsed menu button |
| 12/01/2020                                | Re-ordering columns doesn't work when you switch to md  | index-pricing | Swapped it from re-ordering to hiding and showing elements based on screen size                            |
| 13/01/2020                                | Footer not sticking to the bottom of the page   | all           | Fixed by putting sections heights into vh rather than px   |
| 14/01/2020                                | Footer being overlapped by forms  | Members page  | Partial solution to add padding-top to footer in terms of vh   |
| 14/01/2020                                | Collapse menu takes up the whole screen and you can click anywhere, not just on the word to take you to a link    | Index/all     | Edited the width of the <a> tags   |
| 04/01/2020                                | Contact us is wrapped in the larger menus   | index/all     | adjusted margins   |
| 02/02/2020                                | Footer icons go onto two lines for xs   | all           | adjusted padding   |
|   | Check button is not inline with Remember me on xs or small screen   | login         | adjusted padding   |
|   | Icons are not inline with text on meetings xs and small screens   | meetings      | adjusted padding   |
|   | Info text needs to be a bit bigger or a line-break added. Sm screen   | meetings      | Added a class optional line break in.  |
|   | Location button hides location behind   | meetings      | See below  |

Pricing id tag is hidden behind header

login page when  
clicked from  
menu

I inserted the anchor into a div. I placed the div at the top of the pricing section and gave it a height of 60px which is the same as my header. I then created two more nested divs -each with a height of 30px. I gave each nested div a background colour of the section above and below. Initially I hid the div and made it appear using `div:target`. The result was when the link was click a div appeared and each section appeared to just have a bit more padding.

## De-bugging Log

Project: User-

| Date       | Description  | Screen | Page                              | Solution  |
|------------|--|--------|-----------------------------------|---|
| 02/02/2020 | Footer icons   | xs     | all                               | reduced the padding between social icons from 1.5rem to 1rem.   |
|            | Check button is not inline                                 | xs     | login                             | Fixed - mysteriously...   |
|            | Icons are not inline with Info text                        |        | meetings                          | added inline class to the icons   |
|            | needs to be a Location button hides location behind header |        | meetings                          | added a <br> in the line<br><br>I inserted the anchor into a div. I placed the div at the top of the pricing section and gave it a height of 60px which is the same as my header. Initially I hid the div and made it appear using div:target.
